Getting the Software The RSLogix Micro Starter Lite software is only available as a download at <http://www..> Next, install the RSLogix Emulate 5 First Steps with RSLinx RSLinx is the software RSLogix will use to communicate with your PLC or in our case to the emulator.. Under the Available Drivers Types select the SLC 5 DH4 85 Emulator driver and click the Add New button.. RSLogix Emulate 5 The emulator is pictured below I know It doesnt look like much but it gets the job done.. You can give the driver a name but I just leave it at the default of EMU5.

In RSLogix Micro Starter select the Comms System Comms menu item The following dialog box will pop up.. Logix 1 00 0 and then clicked the OK button FYI, if you ever work with the purchased version of RSLogix 5.. Leave the configuration options as Station Number 0 OK Your driver should now be running and look like the picture below.. Now click on the Examine if Closed instruction to add it to the rung Double click on the question mark above it and enter I 00 as its input address.. Double click on the question mark above it and enter O 00 as its output address.
